

MDWeb™

MDWeb™ is comprehensive cardiac image and report viewing software that works on any standard computer with an Internet browser. Wherever you are and whenever you need it, MDWeb's advanced image and information processing features bring you a click away from crucial cardiac images and reports stored in the TCS Symphony™ database and archive.

Extend Your Reach

MDWeb provides cost-effective access to images and information from any computer equipped with an Intranet or Internet connection and web browser. Consultation, patient referral and distance learning become simple, fast and secure.

Extend Your View

On the local network, at home or away, MDWeb gives you the same advanced image processing tools for medical grade image enhancement, manipulation and comprehensive loop control that are available on TCS professional review stations. A high quality DICOM image of any frame is just one click away.

Extend Your Productivity

MDWeb not only supports report viewing, but also integrates with TCS Symphony report generation packages to deliver a comprehensive work environment from any location – office, clinic or home.

MDWeb at a Glance

- **Accessible** – MDWeb lets you access and view cases and reports from any computer equipped with a standard web browser.
- **Capable** – MDWeb supports all DICOM 3.0 modalities, including cath, echo, NM, MR, CT, SC, CR and RF.
- **Powerful** – The sophisticated MDWeb viewer gives you real-time procedural playback, a resizable windows view and multiple-run comparison. It provides all the image enhancement tools available on professional review stations.
- **Secure** – MDWeb's advanced information security mechanism works together with standard Internet firewalls to form a fully secure working environment. This makes HIPAA compliance easier for you.
- **High Quality** – MDWeb provides superior image quality in both lossless and lossy modes.
- **Fast** - Instant access to thousands of procedures stored on the TCS Symphony database and/or archive is yours whenever you log on to MDWeb.
- **Flexible** - File size and compression quality are user configurable.
- **Optimized** – MDWeb's unique design optimizes and reduces network traffic.

Security

Medcon incorporates Secure Socket Layer (SSL) security technology into MDWeb to make it compatible with the Department of Health and Human Services HIPAA Standards. SSL encryption verifies identity and prevents altering and interception of data being received and transmitted.

System Requirements

Minimum requirements for MDWeb client:

- Pentium II 300 MHz or higher
- Windows 98 or higher with minimum of 64MB memory
- Internet Explorer 5.0 or higher

Medcon Telemedicine Technology, Inc.
